Work Experience

Malltina - 1.5 Years

As a team member of the software engineering team, my main obligation was to develop the back-end of Malltina online store using Laravel, Mysql, MongoDB, Redis. I always develop API for the front-end app and refactor the old services. Ether I develop some front-end stuff for the admin panel using Bootstrap and Jquery.

11th Iran web and mobile festival - 8 Months

I was developing the IWMF website using Laravel and Mysql and Docker. It is the biggest event to select the best website and mobile applications in the year in Iran.

Iran Hardware Center - 8 Months

I was in the infrastructure and design team. My main obligation at that company was managing servers That must handle over 130 Wordpress websites. I used Ubuntu servers with Virtualmin control panel that helps me to manage servers easier.

TekData - 2 Years

I was the only developer in that company and I design Donamall online store and one website for that company using Wordpress. Also, I make a factoring and ticketing system using PHP and Mysql. Also, I managed them on a Ubuntu server with Virtualmin control panel.
